

To Whom It May Concern:

I am writing to encourage you to stop any plans to allow LPFM broadcast service to supercede any FM translated programming. The only radio station I listen to K-LOVE is often heard on FM translators. This station is very important to me, and to a multitude of Christians across this nation and in other countries.

K-LOVE has positive, family-friendly programming. I love to listen to the music because it helps me keep my life in perspective and put God first. I play K-LOVE in my car all the time and my daughters sing along with the songs. It is a joy to me to hear them sing such positive lyrics when so many radio stations are playing songs that promote immorality and violence. I think many non-Christian families enjoy K-LOVE because they know their children will not be adversely effected by what they hear.

K-LOVE is also a radio station that serves the community. They allow organizations to "advertise" their free events on the community calendar and do not charge for the service. I have asked them to advertise our Vacation Bible School program and they have always been faithful to follow through. This community calendar helps promote individual involvement in positive activities that enrich the community as a whole. So many radio stations accept advertising for activities we would not want our children to be involved in: bars, sexual related product, etc.

I believe you should do everything possible to keep K-LOVE on the air. I know they can be heard even overseas and that many of our service people find comfort in listening. Please consider all the wonderful influences K-LOVE has on individuals and the community as a whole in relation to the possible influences the LPFM translators could have. A balance is necessary. K-LOVE and stations like it are in the minority. They offer a programming alternative for those of us who prefer a positive, Christian influence in our families and personal lives. Please do not make any decisions that might take away this option.

Respectfully,

Dedra L. Allomong
